

## **PSP Work Group 9-29-2015**

Present: Lindsey Carter, Jerry Kimkowski, Rose Brock, Loretta Lowe, Marie Amundson, Brooke Bartholomew, Adelia German

### **1. Review Sample PSP**

- Discussion about capturing health and safety requirements in Plan of Care, while still ensuring it's person centered and not about the agencies documentation needs.
- It might be easier for providers to continue with having health and safety in the actions.
- A separate form was suggested at provider listening session. On one side it has, "in order to reach my goals" and on the other it says, "Medicaid service that will be used to reach my goal."
- Group reached the consensus to separate health and safety into its own vision.

### **2. Rights Restriction**

- Rights Restriction form is not to be used
- Health and Safety concerns that require a restriction should be an action statement. Typically an action plan would then be expected, but not always.
- Documentation of Health and Safety Concerns could be on the vision page, comments-action page, where information is captured depends on the individual situation and restriction.

### **3. PSP Notes**

- When IP changed to PSP, notes went away
- Discussion around where the notes should be in the PSP and who should take them
- Group decided notes should be the final page of the PSP. The process would be the team would decide who takes the notes, the notes get disseminated and then the team gets a week to review notes and submit requests for changes/clarifications. If there is no response, consensus is assumed.

### **4. PSP work group to pilot rights restriction documentation changes and PSP notes**

### **5. Agenda for next meeting- edit Module 10**
